前期日程

令和7年度入学者選抜学力検査問題

英　　語　（本文12ページ）

データサイエンス経営学部	
（文系型で受験する者）	15時00分――17時00分
（理系型で受験する者）	16時15分――17時00分
国際学部	15時00分――17時00分
工学部	16時15分――17時00分
農学部	15時40分――17時00分

〔注意〕

1. 検査開始の合図があるまで，この問題冊子の中を見てはいけない。
2. 「受験番号」は，解答用紙の受験番号欄に忘れずに記入しなさい。
3. この問題冊子には4問題ある。落丁，乱丁，印刷不鮮明の箇所などがあった場合は申し出なさい。
4. 解答は，必ず解答用紙の所定の解答欄に記入しなさい。所定の欄以外に記入したものは無効である。
5. **データサイエンス経営学部**志願者について，文系型で受験する者は，全問題を，理系型で受験する者は，第2問のみを解答しなさい。
6. **国際学部**志願者は，全問題を解答しなさい。
7. **工学部**志願者は，第2問のみを解答しなさい。
8. **農学部**志願者は，第1問及び第2問を解答しなさい。

第１問 次の英文を読み，後の問いに答えよ。

Thanks to social media, new words and phrases such as (1)"digital nomad," "hellscape," and "trauma dumping" are added to the English dictionary more often than ever, but where do they come from?

When people think of those who create new words throughout history, male writers are likely to come to mind. Shakespeare invented more than 1,700 words, including "bedroom" and "courtship," and Charles Dickens first used the words "butterfingers" and "doormat."

Despite contributions from such famous writers, historians say that another group has an even greater impact on the development of language: teenage girls. A sociolinguist[注1] observed in the early 2000s that women lead up to 90 percent of linguistic[注2] changes and wrote that women are often linguistically (　2　) of men by a full generation.

Now, women are leading the way online. Though "rizz"[注3] — the 2023 word of the year selected by Oxford University Press — was (3)coined by a man, several other new words, including "situationship" and "Swiftie," were inspired or first used by women. The term "goblin mode," which refers to lazy behavior, was Oxford's 2022 word of the year and appears to have been first used by a woman on Twitter in 2009.

It is often impossible to tell who first used new words. Shakespeare may not have invented all the words people think he did. Experts think that (4)he probably used language his audience was already familiar with. Sali Tagliamonte, a linguist at the University of Toronto, says that whether or not young girls invent new phrases, they are more likely to be early adopters of the latest vocabulary and that (5)they are pushing changes forward.

Linguists who reviewed 6,000 letters written between about 1410 and 1680 found that for 11 out of 14 observed language changes, women were quicker to adopt the new way of writing. These changes include the elimination of "ye,"

meaning "you," the transition from "mine eyes" to "my eyes," and the switch from words like "hath" and "doth" to "has" and "does." Terttu Nevalainen, one of the authors of the study, says that Queen Elizabeth I was one of the most linguistically progressive people of her day, using "does" instead of "doth" in letters to her brother Edward.

Even fictional women lead linguistic change, according to a 2005 study by Tagliamonte on the use of emphasizing words such as "so," "really," and "very" in the TV show *Friends*. Though the show had scriptwriters, the actors often decorated their lines and helped construct dialogue. The study found that Rachel, Monica, and Phoebe were more likely to use "really" than Ross, Chandler, and Joey, and twice as likely to use "so," a more recent language change. "Very," the oldest word in the study, with origins in the 15th century, was used equally by the male and female characters.

There are a handful of possible reasons why girls lead language creation. According to Gretchen McCulloch, author of *Because Internet: Understanding the New Rules of Language*, women tend to be more socially aware. She says that they have larger social circles and may be exposed to more language diversity, and that because women tend to be caregivers, boys usually learn language from their mothers, whereas women and girls learn words from other women.

Tagliamonte says that even in male-dominated spaces like online gaming communities, women use new terms more frequently than their male counterparts, (6) which is shocking, and that you would think it wouldn't matter if you were male or female in online communities.

With the rise of social media, language changes are happening faster than ever. Nevalainen says that the transition from "ye" to "you" took about 80 years, which was very rapid for the time, but today, changes can happen within a year. She says that we are not writing letters; we are talking to people all the time, even those on the other side of the country.

One 2018 study examined this phenomenon, listing 54 emerging word forms posted by American Twitter users including "amirite" (am I right?) and "cosplay" (costume role-playing). Though the published research did not cover gender differences, Jack Grieve, a linguistics professor at the University of Birmingham, noticed a difference between men and women in the data analysis by saying that more often than not, women took the lead role in change, especially black women.

Women leading language change often face challenges, though. Tagliamonte says, "Due to generation gaps, (7) young women who use new words are subject to so much criticism. Older people criticize young people for how they talk. They notice language changes they don't like. However, language has its own path and its own system, it changes whether we like it or not, and we're all part of those changes without even knowing it."

(Adapted from *The National Geographic*, January 19, 2024)

注 1　sociolinguist：社会言語学者

注 2　linguistic：言語的な

注 3　rizz：charisma（カリスマ）が rizzma を経て省略された語

問 1　下線部(1)の語句はどのようなことを表す例として挙げられているか。日本語で説明せよ。

問 2　空所(2)に入る単語として最も適切なものを以下の中から選び，記号で答えよ。

a．behind　　b．superior　　c．lack　　d．ahead

問 3　下線部(3)の単語の本文中での意味に最も近い単語を以下の中から選び，記号で答えよ。

a．paid　　b．made　　c．spoken　　d．selected

問 4　下線部(4)を日本語に訳せ。

問 5　下線部(5)の表す意味に最も近い文を以下の中から選び，記号で答えよ。

a．they are playing a key role in shaping the future of language

b．they are quickly creating new vocabulary

c．they are influencing how language is perceived

d．they are following trends in communication

問 6　下線部(6)は，何が shocking であると言語学者 Tagliamonte は言っているか。日本語で説明せよ。

問 7　下線部(7)のようなことが起こるのはなぜか。日本語で説明せよ。

問 8　次のそれぞれの英文について，本文の内容に合うものには○を，合わないものには×を記入せよ。

a．According to a sociolinguist, most linguistic changes are created by women.

b．It is not difficult to know who first invented new words.

c．Social media has accelerated the pace of language changes, allowing new terms to become popular much more quickly.

d．In the TV show *Friends*, male characters used the word “so” more often than female characters.

e．The 2018 study by the University of Birmingham found that men were more likely to use emerging word forms on Twitter.

f．We unconsciously contribute to language changes.

第2問 次の英文を読み，後の問いに答えよ。

I was exactly thirteen in September 1929 when the time came for me to go to Repton. On the day of my departure, I had first of all to get dressed for the part. (1) I had been to London with my mother the week before to buy the school clothes, and I remember how shocked I was when I saw what I was expected to wear. (2)

"I can't possibly go about in *those*!" I cried, "Nobody wears things like that!"

"Are you sure you haven't made a mistake?" my mother said to the shop assistant.

"If he's going to Repton, madam, he must wear these clothes," the assistant said firmly.

And now this amazing fancy-dress was all laid out on my bed waiting to be put on. "Put it on," my mother said. "Hurry up (3) you'll miss the train."

"I'll look like a complete idiot," I said. My mother went out of the room and left me to it. With immense reluctance, I began to dress myself.

First there was a white shirt with a detachable white collar. This collar was unlike any other collar I had seen. It was as stiff as a piece of plastic glass. At the front, the stiff points of the collar were bent over to make a pair of wings, and the whole thing was so tall that the points of the wings, as I discovered later, rubbed against the underneath of my chin. It was known as a butterfly collar.

Around the collar but underneath the butterfly wings, I tied a black tie, using an ordinary tie-knot.

Then came the trousers and the braces.[注1] The trousers were black with thin pinstriped grey lines running down them. I buttoned the braces on to the trousers, six buttons in all, then I put on the trousers and adjusted the braces to the correct length by sliding two brass clips up and down.

I put on a brand-new pair of black shoes and laced them up.

Now for the waistcoat.[注2] This was also black and it had twelve buttons down the front and two little waistcoat pockets on either side, one above the other. I put it on and did up the buttons, starting at the top and working down. I was glad I didn't have to chew each of those button-holes to get the buttons through them.

All this was bad enough for a boy who had never before worn anything more elaborate than a pair of shorts and a blazer. But (4) the jacket put the lid on it. It wasn't actually a jacket, it was a sort of tail-coat,[注3] and it was without a doubt the most ridiculous garment I had ever seen.

My sisters shrieked with laughter when I appeared. "He can't go out in *those*!" they cried. (5) "He'll be arrested by the police."

"Put your hat on," my mother said, handing me a stiff wide-brimmed straw-hat with a blue and black band around it. I put it on and did my best to look (6) dignified. The sisters fell all over the room laughing.

My mother got me out of the house before I lost my nerve completely and together we walked through the village to Bexley Station. My mother was going to accompany me to London and see me on to the Derby train, but she had been told that on no account should she travel farther than that. I had only a small suitcase to carry. My trunk had been sent on beforehand labelled "Luggage in Advance".

"Nobody's taking the slightest notice of you," my mother said as we walked through Bexley High Street.

And (7) curiously enough nobody was.

"I have learnt one thing about England," my mother went on. "It is a country where men love to wear uniforms and unusual clothes. Two hundred years ago their clothes were even more unusual than they are today. You can consider yourself lucky you don't have to wear a wig on your head and ruffles[注4] on your sleeves."

"I still feel stupid," I said.

"Everyone who looks at you," my mother said, "knows that you are going away to a public school. All English public schools have their own different crazy uniforms. People will be thinking how lucky you are to be going to one of those famous places."

We took the train from Bexley to Charing Cross and then went by taxi to Euston Station. At Euston, I was put on the train for Derby with a lot of other boys who all wore the same ridiculous clothes as me, and away I went.

(Adapted from "Getting Dressed for the Big School," *Boy: Tales of Childhood* by Roald Dahl (1984), Puffin Books)

注 1　braces：ズボンつり
注 2　waistcoat：チョッキ，ベスト
注 3　tail-coat：燕尾服
注 4　ruffles：ひだ飾り

問 1　下線部(1)の part と同じ意味・用法の例を以下の中から選び，記号で答えよ。

a. The actors played the parts of Romeo and Juliet.
b. His autobiography will be published in parts.
c. We assemble parts into a car in this factory.
d. The police gave us only part of the story.

問 2　下線部(2)を日本語に訳せ。

問 3　空所(3)に入る適切な英単語を答えよ。

問 4　下線部(4)の言い換えとして最も適切な文を以下の中から選び，記号で答えよ。

a．the jacket looked by far the worst of all the clothing items the boy had put on

b．the jacket was so large that it would cover up every other item of clothing the boy had put on

c．the jacket was so funny-looking that it made the whole dressing experience even worse

d．the jacket looked good enough for the boy to stop worrying about the school clothes any longer

問 5　下線部(5)のようなことをなぜ言ったのか。句読点を含めて 50 字以内の日本語で答えよ。

問 6　下線部(6)に意味が最も近い単語を以下の中から選び，記号で答えよ。

a．beautiful　　b．polite　　c．respectable　　d．brave

問 7　下線部(7)について，省略されている内容を明らかにしながら，日本語に訳せ。

問 8　次のそれぞれの英文について，本文の内容に合うものには○を，合わないものには×を記入せよ。

a．The boy's mother had known what the school uniform looked like before they bought it.

b．The boy did not know that the collar would make his chin feel uncomfortable until he actually tried it on.

c．The boy struggled to put on the school clothes all by himself.

d．Nobody who came across the boy and his mother on Bexley High Street knew where he was going.

e．After getting out of the taxi at Euston Station, the boy was all by himself and got on the train.

第3問 Read the passage and answer the question below in about 150 words. Provide reasons to support your opinion. At the end of your answer, enter the number of words you have written. Commas, periods, and other punctuation marks are not included in the word count.

Japanese children are getting smartphones earlier than they used to, according to a survey done by leading mobile carrier NTT Docomo, Inc.[注1] The study it did last November showed that children on average were given their first smartphone when they were 10.63 years old. The average age was 11.34 in the previous survey in 2019. By gender, girls and boys became smartphone owners at ages 10.47 and 10.83, respectively. Many of them started bringing their devices to school at age 12, around the time they entered junior high school.

Another survey, carried out on parents by cram school Meiko Gijuku, found that 53.5% of Japanese junior high students and 91.5% of high school students owned a smartphone. The most common reason for purchasing a smartphone, cited by 61.2% of the respondents,[注2] was the convenience of communicating with a child via Line. The next two most common reasons were that the child's friends already had smartphones (39.2%), or simply that the child wanted a smartphone (20.1%). More specific reasons included the following: "After entering high school, my child will be coming home later, so I want to be sure we can contact each other" (parent of a third-year junior high student); "My child is often riding the train or bus alone to go to cram school or other activities" (parent of a first-year high school student); and "The high school my child wants to go to is far from our house, so we need a way to communicate, and there are not many public phones these days" (parent of a third-year junior high student).

(Adapted from *The Asahi Shimbun*, April 14, 2022 & *nippon.com*, April 26, 2019)

注 1　Inc.：incorporated 法人組織の

注 2　respondent：回答者

Question: At what age do you think it is appropriate for children to have a smartphone?

第４問 Complete the following two conversations by filling the blank lines with appropriate responses. The length of your answer does not necessarily have to match the length of each line.

Conversation A

Emma: Are you thinking about getting a part-time job when you get to university?

Shion: Yes, I am! I need to save some money. What about you?

Emma: Same here. I'm thinking about working at a café. I like making coffee, and hopefully I can get some delicious free food.

Shion: That sounds good! I'd like to work at a bookstore. (1) _____ _____.

Emma: Yeah, a bookstore would be perfect for you. I also thought about being a tutor for junior high students. (2) _____ _____.

Shion: Yeah, you'd be a great tutor. I'm a bit worried about the number of jobs available, though. (3) _____?

Emma: I'm not sure if it's easy to find one, but I hope it is!

Shion: Me, too. (4) _____?

Emma: Well, I want to work only after school and on weekends. How about you?

Shion: Same. I wouldn't want it to interfere with my schoolwork.

Emma: Good plan. Let's start applying soon. We might get lucky!

Shion: Definitely. Let's keep each other updated on how it goes!

Conversation B

Rose: I heard you arguing on the phone. (1)_____?

Julia: I was talking to my parents. They got a complaint from a neighbor that there's a nest of honeybees in our backyard. They say it's dangerous. And so they asked us to destroy it.

Rose: Okay. But what was the argument about?

Julia: Well, my parents plan to destroy the nest, but I don't think they should. Everyone fears bees, but the killing of bee nests is one reason why farmers and gardeners have problems. (2)_____.

Rose: And so you want to keep the nest safe? I'm sure your neighbors won't be happy with that.

Julia: (3)_____?

Rose: You could call a beekeeper to take the hive away. Or maybe you can just live with unhappy neighbors.

Julia: (4)_____. How does that sound?

Rose: That sounds good to me!
