2025年度一般選抜(前期日程)入学試験問題

試験開始の指示があるまで、この問題冊子の中を見てはいけません。

英　　語(250点)

注　意　事　項

1. 解答はすべて解答用紙に記入すること。
2. 解答用紙は1、2、3、4の4枚。
3. リスニングテストは試験開始後90分たってから、放送によって行う。その際、解答用紙Ⅳを準備すること。
4. 英米学科・ロシア学科・中国学科・イスパニア学科・第2部英米学科については、各配点を1.2倍した点数とする。
5. 印刷不鮮明、ページの落丁、乱丁に気付いた場合は、手を高く挙げて監督者に知らせてください。
6. 問題冊子の余白等は適宜利用して構いません。
7. 不正行為について
   ① 不正行為に対しては、厳正に対処します。
   ② 不正行為に見えるような行為が見受けられた場合は、監督者がカードを用いて注意します。
   ③ 不正行為を行った場合は、その時点で受験を取りやめさせ退室させます。
8. 試験終了後、この冊子は持ち帰ってください。

I　次の英文を読んで、以下の設問に答えなさい。(65 点)

As every parent knows, young children speak idiosyncratically. (A) A child growing up in an English-speaking family, for example, might say 'I brang it', even though everyone around them says 'I brought it' to mean the same thing. Even when the child does say 'I brought it', they may still not pronounce the words as adults do. They might, for example, say 'I bwort it'. (1) Parents — even the most anxious ones — are usually indulgent of such deviations. They are the stuff of anecdotes and affectionate memories rather than serious concern. It is clear, after all, what the child is saying, and most idiosyncrasies disappear of their own accord. (B)

At school, however, the situation is very different. Here the child is expected, and taught, to use language 'correctly'. Not only are English-speaking children expected to say the words 'I brought it' clearly and properly pronounced, but also to write them correctly spelt (or should that be spelled?) and punctuated. So not only is 'I brang it' wrong, but also, in writing, are 'I brort it', and 'I brought, it'. Indeed, teaching children their own national language or languages is, in many people's view, synonymous with eliminating such deviations. A good deal of school time is spent on this task, and a good deal of the child's educational success will depend upon the results. (2)

In the case of pre-school 'brang' or 'bwort' there is little to be concerned about. In school, however, the issue of what counts as correct is much more complex. What of the child who, through some speech impediment, never does make the transition from 'bwort' to 'brought'? (C) What of the child who pronounces 'I brought it' in a regional accent with an *ah* sound as 'I brart it', or says 'I seen it' (instead of 'I saw it'), not for some short-lived developmental reason, but because this is what their family and friends say too, as part of their dialect? What of the child who has recently moved to Britain from the USA and says, as their parents do, 'I've gotten it' instead of 'I've got it', and writes 'color' instead

of 'colour'? Should the teacher eliminate these dialectal and national variations, thus seeming to correct the parents as well? The voices of school and home are not always the same. To make matters more complex still, a third voice — the voice of the peer group — speaks ever louder and more persuasively as children grow older. They put 'RU' instead of 'are you' in text messages; they give words different fashionable senses, invent new ones, and include slang or swear words of which the adults disapprove, even if they use them themselves.

Within the school context, by far the most controversial aspect of this situation involves the relationship of the standard form of the language to dialects. The standard is generally used in written communication, taught in schools, and codified in dictionaries and grammar books. Dialects are regional and social-class varieties of the language which differ from the standard in pronunciation, grammar, and vocabulary, and are seldom written down at all. The teaching of the standard can be viewed in two quite contradictory ways. (3) On the one hand, it can be seen as conferring an unfair advantage upon those children who already speak a variety close to it, while simultaneously denying the worth of other dialects and devaluing the cultural heritage of those children who speak them. On the other hand, given that the standard exists, has prestige and power, and provides a gateway to written knowledge, it can be argued that teaching it helps to give an equal opportunity to all. In support of this latter view, there is no reason why children cannot grow up knowing both a dialect and the standard form, valuing both in different ways and using them appropriately according to context.

Schools are a good barometer of both language use and social values, and their approach to teaching the national language or languages arises from two interesting facts. The first fact is that a language is subject to enormous variation. There are differences between individuals, social groups, generations, and nations, and language is used differently in speech and writing, and in formal and informal situations. The second fact is that many people (4) are intolerant of

this variation. They struggle for a single 'standard' way of using the language and care very deeply about achieving this norm. This is why there is general support for schools in their attempt to teach a standard form of the language to all pupils, and why many people get so hot under the collar (D) about anything they perceive as incorrect. 'Incorrect' language is seldom seen as just different, but is typically described as 'wrong', 'lazy', 'dirty', 'illogical', or 'corrupt'. Yet while there is general agreement over the need for a standard, there is often disagreement over the details, and when this happens there can be some very bitter arguments indeed. If we engage with the people who are in the thick of decision making about which forms are acceptable in which contexts, then a major task is not only to understand the nature of variation in the system itself, but also why this variation can be such an emotive issue.

問 1　下線部(1)を日本語に訳しなさい。

問 2　下線部(2)について、the results は何に対しての結果を指しているか、句読点を含めて 40 字から 60 字の日本語で説明しなさい。

問 3　下線部(3)について、two quite contradictory ways とはどのような見方か、それぞれ日本語で説明しなさい。

問 4　下線部(4)について、many people はどのような人々か、以下の選択肢から最適なものを１つ選び、記号で答えなさい。

(ア) Those who are in charge of deciding language standards

(イ) Those who assume that a single standard exists for each language

(ウ) Those who teach national languages to children at school

(エ) Those who use national and foreign languages incorrectly

問 5　下線部(A)～(D)の語句について、最も近い意味の表現をそれぞれの選択肢から選び、記号で答えなさい。

(A) idiosyncratically

(ア) conventionally　　(イ) distinctively

(ウ) dramatically　　(エ) typically

(B) of their own accord

(ア) anecdotally　　(イ) coincidentally

(ウ) naturally　　(エ) willfully

(C) impediment

(ア) difference　　(イ) discrimination

(ウ) disorder　　(エ) diversity

(D) hot under the collar

(ア) embarrassed　　(イ) frightened

(ウ) furious　　(エ) injured

問 6　子どもの言葉遣いに影響を与えるものとして、家庭と学校以外にどのような要素があると指摘されているか。本文中から６語の英語で抜き出しなさい。

Ⅱ　次の英文を読んで、以下の設問に答えなさい。(65 点)

A subversive (A) urban agriculture group in San Francisco has turned the simple activity of gardening into an act of creative civil disobedience by converting ornamental trees into fruit-producing greenery. The process goes something like this: a small cut is made in existing street trees that allows industrious (B) grafters to add living branches from other fruit-bearing trees. These Frankensteined* branches become part of the existing tree and eventually bear edible fruits. This approach is a form of 'guerrilla gardening' — a term rooted in green urban activism that can be traced back to New York.

In the early 1970s, Lower Manhattan activists began turning vacant lots into community gardens starting with small tactical interventions, then expanding to larger projects. An artist who lived in the city's Lower East Side named Liz Christy cofounded a group called the Green Guerrillas. This crew began to throw 'seed bombs' packed with fertilizer, seeds, and water over fences into abandoned lots. Stepping things up, they also took over an entire vacant property and cleared out the site to plant flowers, trees, fruits, and vegetables. The group then appealed to the city's Housing Preservation and Development Department to make the community garden official. The place has since been renamed in honor of Liz Christy and continues to be maintained by a group of dedicated community volunteers.

The idea of turning unused space into community plots has taken off and branched out around the world. Guerrilla gardening has come to refer to a whole range of informal greening projects, including ongoing seed-bombing initiatives aimed at populating (C) deserted lots, road medians, and other barren places with living plants. The contents of these green bombs can vary greatly. Some include native species selected for ecological reasons or sets of seeds carefully chosen to flower in sequence. (1) Other activists and artists have taken to growing greenery on vertical surfaces, a process akin to painting walls. By mixing ingredients like

buttermilk, gardening gel, and crumbled moss, creators produce a kind of organic 'paint', then apply it to surfaces like old concrete walls. The results are living artworks that slowly grow into bold and highly visible statements.

Many of these efforts are arguably more about attention-grabbing artistry than about making a lasting impact on the ecology of cities, but not all guerilla gardening projects are so flashy. Many successful interventions persist because they are thoughtfully planned and executed with sensitivity to local environments. Californian guerilla gardener Scott Bunnell has spent years planting drought-tolerant species like aloe vera, agave, and other varieties of exotic plants along road medians and highways. In large part, he has received praise for the efforts of his group, the SoCal Guerilla Gardening Club. They have even petitioned officials for access to municipal water to keep (2) these regionally appropriate plants alive and well.

Back in San Francisco, one might expect a similarly positive response from authorities to the fruit-tree grafting, but the city's Guerrilla Grafters intentionally keep a low profile to avoid official attention. They do not create maps so people cannot find trees they have worked on. The results of their interventions are only visible once they literally bear fruit. (3) This stealthy approach is motivated by a fear that the city would actively undo their work. On the surface, turning a decorative tree into a fruit-bearing one seems like a positive contribution, but from the city's perspective, such additions undermine municipal goals.

While the city of San Francisco has thousands of apple, plum, pear, and other fruit trees — and more than 100,000 public trees in total — these are intentionally rendered sterile* to avoid attracting animals and making messes. Productive fruit trees mean more work for city maintenance crews, which have to clean up fallen and rotting fruit. For their part, the grafters argue that they are helping to (D) address urban food scarcity as well as raise awareness about the accessibility of fresh fruit. Tensions like these can be found at the intersection of a lot of top-down plans and bottom-up approaches — conflicts between different visions for

what a city can and should be and how it should serve its citizens.

Other cities like Toronto offer potential templates for reducing such tensions in the form of nonprofits like Not Far from the Tree. For years, this organization has paired volunteer pickers with a network of fruit-bearing trees on properties around the city. Volunteer-picked fruits are then divided among residents who register fruit trees, people who pick the fruits, and an array of food banks, community kitchens, and other such institutions — a trio of sorts that makes use of a massive, distributed urban orchard.

注

*Frankensteined: つぎはぎの、寄せ集めの

*intentionally rendered sterile: 意図的に実がならないようにされた

問 1　下線部(1)を日本語に訳しなさい。

問 2　下線部(2)について、these regionally appropriate plants とはどういう植物か、その具体的な性質を 10 字以内の日本語で説明しなさい。

問 3　下線部(3)の This stealthy approach とはどのようなものか。句読点を含めて 70 字から 80 字の日本語で説明しなさい。

問 4　下線部(A)～(D)の単語について、最も近い意味の表現をそれぞれの選択肢から選び、記号で答えなさい。

(A)　subversive

(ア)　artistic　　(イ)　disruptive

(ウ)　professional　　(エ)　sustainable

(B)　industrious

(ア)　cunning　　(イ)　infamous

(ウ)　mechanical　　(エ)　zealous

(C)　populating

(ア)　advertising　　(イ)　filling

(ウ)　moistening　　(エ)　visiting

(D)　address

(ア)　deal with　　(イ)　live in

(ウ)　send out　　(エ)　talk to

問 5　次の英文の中から本文の内容と合致するものを２つ選び、記号で答えなさい。

(ア)　Cities generally welcome productive fruit trees grafted by guerrilla gardeners.

(イ)　Guerrilla gardening has its roots in New York and later spread beyond the United States.

(ウ)　Not Far from the Tree distributes volunteer-picked fruits to various groups such as food banks.

(エ)　The goal of guerrilla gardening projects is to destroy public spaces.

(オ)　The Green Guerrillas began their projects by throwing 'seed bombs' into Scott Bunnell's gardens.

(カ)　To make a lasting impact on the ecology of cities, guerrilla gardening activities should be flashy.

Ⅲ　以下の問いに答えなさい。(70 点)

問 1　Write a paragraph of approximately 100 words in English in response to the following:

Imagine that all high schools in Japan will introduce a third language for students to learn. Other than Japanese and English, which language would you choose and why?

問 2　次の日本文の下線部(1)、(2)を英語に訳しなさい。

今回のサリー州の家は、S・ワーデンから電車を乗り継ぐと半日がかりにもなったので、しょっちゅう会えるというわけではなかったが、それでも、ウェスト夫人は来るたびに何日か逗留(とうりゅう)し、彼女の存在で私の家は確実に「ホーム」らしさを増していった。

それは夜遅く居間で何げなく始まったウェスト夫人の父親の思い出話だった。私は半分眠りかけていたのだが、彼女の漏らした「父は銃を持つことができなかった」という一言にあっという間に覚醒(かくせい)した。それで次々と質問を浴びせた。(1)彼女は自分の父親の自慢話になるような気配を警戒してか、そういうことは今まであまり話してくれなかったのだ。いつもの、知人の話をするようなヴィヴィッドでいたずらっぽい語り口では全然なかった。私が(いつもと違い)本当に真剣になっているのを察して、訥々(とつとつ)とではあったけれど、語り始めた。

ウェスト夫人はニューヨーク州、バッファローの生まれだ。

父のボーエン氏は、地元の保険会社のようなところで働いていた、ごく普通の市井(しせい)の人である。彼は戦争中徴兵されたが、銃を持つことを徹底的に拒否した。何度も何度も無理やり持たされたがそのたびに下に落とした。殴られ、軍の監獄に入れられた。

そういう、時代の圧倒的な力の前に、個人がどこまで抗し得るか、個性が抹殺されずに生き延びることがどこまで可能か、ということに私は人ごとでなく関心があった。(2)英雄でもなく著名でもないごく普通の人々が、自らの尊厳を守り抜く話には敬意を払わずにいられなかった。

(梨木香歩『春になったら苺を摘みに』新潮文庫、2006 年、120-121 頁)

Ⅳ　リスニングテスト(50点)

(試験開始後90分たってから放送によって行なう。その際、解答用紙Ⅳを準備すること。)
